

2017-2018 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 10, Mar. 4th, 2018– Mar. 10th, 2018)

Highlights

- In week 10 of 2018, the majority of individual preliminary local flu activity indicator trends continued to decrease. As a whole, flu intensity (composite indicator) decreased and is now moderate.
- Geographic spread and local intensity designation (Click here for definitions) = WIDESPREAD, MODERATE
- Local medical facility labs reported 1,715 tests run with 275 (16.0%) positive results for week 10 of 2018.
- The percentage of ED visits for both influenza-like-illness (ILI) and respiratory symptom visits decreased compared to last week. The percentage of ED visits for ILI is above while respiratory symptom visits is slightly above their respective baseline averages for the week.
- In week 10 of 2018, trends for local over-the-counter medication category sales tracked were mixed (decrease in thermometer, pediatric anti-fever, and adult anti-fever sales; increase in cough and cold, chest rub, and throat lozenge sales; stable electrolyte sales) compared to last week.
- Nationally, influenza activity decreased. Please visit the CDC website for specific information (National data is usually updated on Friday of each week).

Local Flu Activity Dashboard (All data are preliminary and may change as updated reports are received.)

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (-2% to +2%).

³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are recieved

⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment

⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 10, the preliminary local influenza and influenza-like-Illness (ILI) visit rate to athenaHealth® providers (7.0 per 1,000 visits) decreased compared to the previous week and is above its baseline average for the week (Figure 1). The week 10 percentage of all Emergency Department (ED) visits categorized as ILI decreased compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 10 of 2018, 3.3% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is above the national baseline of 2.2% for week 10.

Laboratory Surveillance

During week 10 of 2018, reporting Franklin County sentinel medical facility laboratories tested 1,715 specimens, with 275 (16.0%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2017 through week 10 of 2018 is 52,843 with 10,715 (20.3%) positives (8,119 type A, 2,588 type B, 7 type A and B, 1 type unknown).

Nationally in week 10 of 2018, clinical laboratories reported 28,157 specimens tested for influenza viruses, 4,223 (15.0%) of which were positive (1,963 type A, 2,260 type B). Public health laboratories reported testing 1,307 specimens, 561 of which were positive (242 type A – of which 55 were A(H1N1)pdm09, 173 were H3N2, and 14 were not subtyped; 319 type B – of which 173 were Yamagata lineage, 25 were Victoria lineage, and 121 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 10, Ohio clinical labs reported 61,503 specimens tested for influenza this season thus far. Positive results include: (168) A(H1N1)pdm09; (584) A/H3N2; (10,077) Flu A Not Subtyped, and (2,635) Flu B (through 3/10/18). In week 10, ODH Public Health Lab reported 1,129 specimens tested for influenza from various submitters this season thus far. Positive results include: (101) A(H1N1)pdm09; (681) A/H3N2; (139) Influenza B (through 3/10/18). Please visit the ODH website for more information.

ED Respiratory Visits

In the 10th week of 2018, the percentage of all ED visits categorized as respiratory decreased compared to the percentage seen the previous week and is slightly above its historic baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 10 of 2018, trends for local over-the-counter medication category sales tracked were mixed (decrease in thermometer, pediatric anti-fever, and adult anti-fever sales; increase in cough and cold, chest rub, and throat lozenge sales; stable electrolyte sales) compared to last week.
